

TAMIHI

The Tamihī is a beautifully presented, fully enclosed cedar garden building. This top class gazebo is exclusively made in Canada and hand crafted from solid cedar wood construction. The windows and door are real smoked glass and all of the frames are made from marine grade aluminum. The French style doors can be located on either of the 4 side and comes with a double lock and heavy duty handle. The roof is made from Canadian Red Wood cedar shaker style tiles and the central sky light, which is UV resistant, allows in natural light and offers a beautiful viewing platform to admire the stars in the evening. This easy to assemble building does not need planning permission and can be assembled within 4 hours.
